INSTALLING THE MACHINE After the connections are made, the tap should be turned poSITIOniNg THE MACHINe on fully and checked for water tightness. For the safety of When considering the location for the dishwasher, ensure your machine, make sure to always turn off the water inlet that there is adequate space to enable loading and tap after each wash program is finished. unloading of the dishes. • Do not put your machine in any location where the WARNING WARNING ambient temperature can fall below 5°C. Note: Aquastop inlet hose has • B efore positioning, take the machine out of its components using 240V. Do not cut packaging by following the warnings located on Aquastop inlet hose. Do not let it get the package. iNSTALLiNg THE MACHINe WARNING WARNING ELEcTRicAL coNNEcTIOn The earthed plug of your machine should be connected to an earthed outlet supplied by suitable voltage and current. If there is no earthing installation, have a competent electrician carry out an earthing installation. In case of usage without earthing installed, our company will not be responsible for any loss of usage that might occur. The indoor fuse current value should be 10-16 A. Your machine is designed for 220-240 V. The machine should not be plugged in during installation. • A lways use the molded plug supplied with your machine. • R unning in low voltage will cause a decline in washing quality. • T he machine's electrical cable should be replaced by an authorised service or an authorised electrician only. Failure to do so may lead to accidents. • F or safety purposes, always make sure to disconnect the plug when a wash program is finished. • I n order not to cause an electric shock, do not unplug when your hands are wet. iNSTALLiNg THE MACHINe 3. A djust the machine feet according to the slope of the floor. 4. F il the machine by pushing the detergent without letting the hoses get crushed or bent. WARNING WARNING After removal of worktop, ensure the opening for the dishwasher is according to the following dimensions. 820mm iNSTALLATIOn... pREPARiNg THE MACHINe foR USE Other tablet detergents contain detergent + rinse aid + pRIoR To UsiNg THE MACHINe foR THE fIRST TIME various extra functions/additives. • Check whether the electricity and water supply specifications match the values indicated by the Generally, combined detergents produce acceptable installation instructions for the machine. results under certain usage conditions only. Such detergents • Remove all packaging materials inside the machine. contain rinse aid in preset amounts. • Fill the rinse aid compartment. Points to consider when using these type of products: dETERGENT USAgE • Always make sure to check the specifications of Use a detergent specifically designed for use in domestic the detergent you will use or whether or not it is a dishwashers. You can find powder, gel, and tablet combined detergent. detergents in the market that have been designed for household dishwashers. Detergent should be put into the • Check if the detergent used is appropriate for the compartment prior to starting the machine. Keep your hardness of mains water. pREPARiNg THE MACHINe foR USE WHEN yoU STOp UsiNg coMBINeD dETERGENTS • Fill the rinse aid compartments. • Select a suitable rinse aid setting. fILLiNg WITH RINSE Aid ANd MAKiNg THE SETTING Rinse aid is used to improve the drying of the wash load and reduce the deposit of cloudy drops and streaks on glasses and dishware. For this reason, care should be taken that there is adequate amount of rinse aid in the rinse aid compartment and only rinse aid produced for use in dishwashers should be used. If the rinse aid lamp on the control panel illuminates, fill the rinse aid compartment with rinse aid. 1. T o put in rinse aid, remove the rinse aid compartment cap by turning it. 2. F ill the rinse aid compartment with rinse aid until the rinse aid level indicator becomes dark; refill the cap by locating the locking pins and close... LoAdiNg yoUR diSHWASHER Correctly loaded dishes will result in the best energy Top BASKET foLLiNg SUPpoRTS consumption, washing and drying performance. There Foldable racks on the upper basket are designed in order are two separate baskets for you to load your dishes into to let you place big items easier such as pots, pans, etc. your machine. You can load into the lower basket round If requested, each part can be folded separately, or all of them can be folded and larger spaces can be obtained. salad plates and cutlery sets. You can use foldable racks by raising them upwards or by folding down. The upper basket has been designed for tea plates, dessert plates, salad bowls, cups and glasses. When placing long-stem glasses and goblets, lean them against the basket edge, rack or glass support wire and not against other items. Do not lean long glasses against one another if they are unsupported, they may break. It is more appropriate to locate the thin narrow parts into the middle sections of baskets. You can place spoons among the other cutlery sets in order to prevent them from sticking to one another. You are recommended to use the cutlery grid in order to obtain the best result. To avoid any possible injuries, always place such long-handle and sharp-pointed items such as serving forks, bread knives etc. with their sharp points facing down or horizontally on the baskets. Top BASKET HEiGHt ADJUSTMENT WHILE IT IS FULL Basket height adjustment mechanism on the top basket of TIPS &... Page 15 LoAdiNg yoUR diSHWASHER UppER cUTLERY BASKET The upper cutlery basket is designed for you to place forks, spoons and knives, long dippers and small items. Because it can easily be taken out of the machine, it allows your dishes to be taken out of the machine along with the basket after washing. The upper cutlery basket is composed of two pieces. If you need to make space for the dishes in the upper basket, you can take out the left or right part of the upper cutlery basket in order to obtain more space. WARNING WARNING Knives and other sharp objects must be placed horizontally in the cutlery basket. LoADiNg LoADiNg... Page 16 LoAdiNg yoUR diSHWASHER LoWER BASKET foLDiNg RAcKS Folding racks consisting of four parts that are located on the lower basket of your machine are designed in order to let you place big items easier such as pots, pans, etc. If required, each part can be folded separately, or all of them can be folded and larger spaces can be obtained. You can use folding racks by raising them upwards, or by folding down. ALTERNATE cUTLERY BASKET An alternate cutlery basket has been provided for convenience. The cutlery basket handle is adjustable - position (a) or (b). The basket can be used in the upper or lower dishwasher basket as required. LoADiNg... Hold START/PAUSE button pressed for approx. 3 sec. until END light blinks After END light starts blinking, the water inside is discharged for approx. 30 sec. Once END light comes on, it means that the cycle has been cancelled SWITcHING THE MACHINe off When the END light comes on, switch your Pull the plug out of the outlet. Turn off the water tap machine off by using the POWER On/Off button TIPS & INFORMATION TIPS AND INFORMATION Note: If the machine door is opened during washing or the power is cut off, the machine resumes the program when the door is shut or the power comes back. MAINTENANcE ANd cLEANiNg Cleaning the machine in regular intervals prolongs the machine's service life. Oil and lime may accumulate in the machine's washing section. In case of such accumulation: Fill the detergent compartment with detergent without loading any dishes into the machine, select a program that runs at high temperature, and start the machine. Alternatively, use descaling material available in the market. (Dishwasher cleaners produced by detergent manufacturers. cLEANiNg THE SEALS IN THE MACHINe dooR To clean any accumulated residues in the door seals, wipe the seals regularly by using a dampened cloth. cLEANiNg THE MACHINe Clean the filters and spray arms at least once a week. Unplug your machine and turn off its tap before starting the cleaning. Do not use abrasive materials when cleaning your machine. Wipe with a fine cleaning material and a dampened cloth. fILTERS Check if any food wastes have remained on the coarse and fine filters. If any food wastes are left, remove the filters and clean them thoroughly under the water tap. a. Micro Filter b. Coarse Filter c. Metal/Plastic Filter 1 To remove and clean the filter combination, turn it counter clockwise and take it out by lifting upwards. MAINTENANcE ANd cLEANiNg SpRAY ARMS Check whether or not the holes for the upper and lower spray arms are clogged. If there is any clogging, remove the spray arms and clean them under water. You can remove the lower spray arm by pulling it upwards, while the upper spray arm nut can be removed by turning the nut to the left. Be sure that the nut is perfectly tightened when refitting the upper spray arm. HoSE FILTER The inlet hose filter reduces contamination (sand, clay, rust etc.) that might be occasionally carried in through the main's water supply or the indoor plumbing, and avoids damage to dishwasher components. Check the filter and the hose from time to time and clean them if necessary. To clean the filter, first turn off your tap and then remove the hose. After removing the filter from the hose, clean it under the tap. Insert the cleaned filter back into its place inside the hose. Refit the hose and check that there are no leaks.
